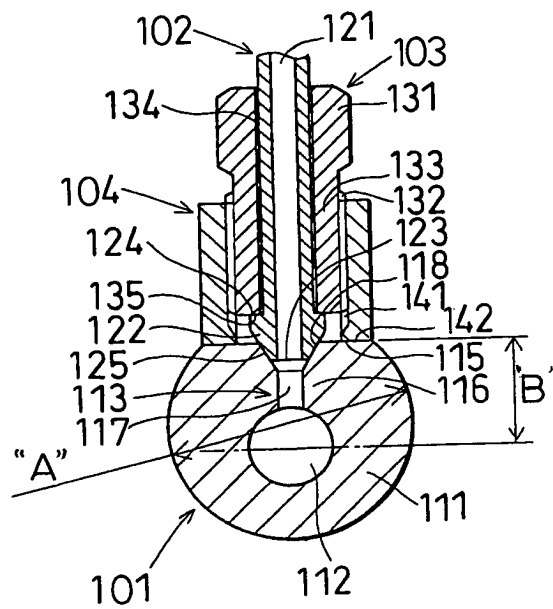

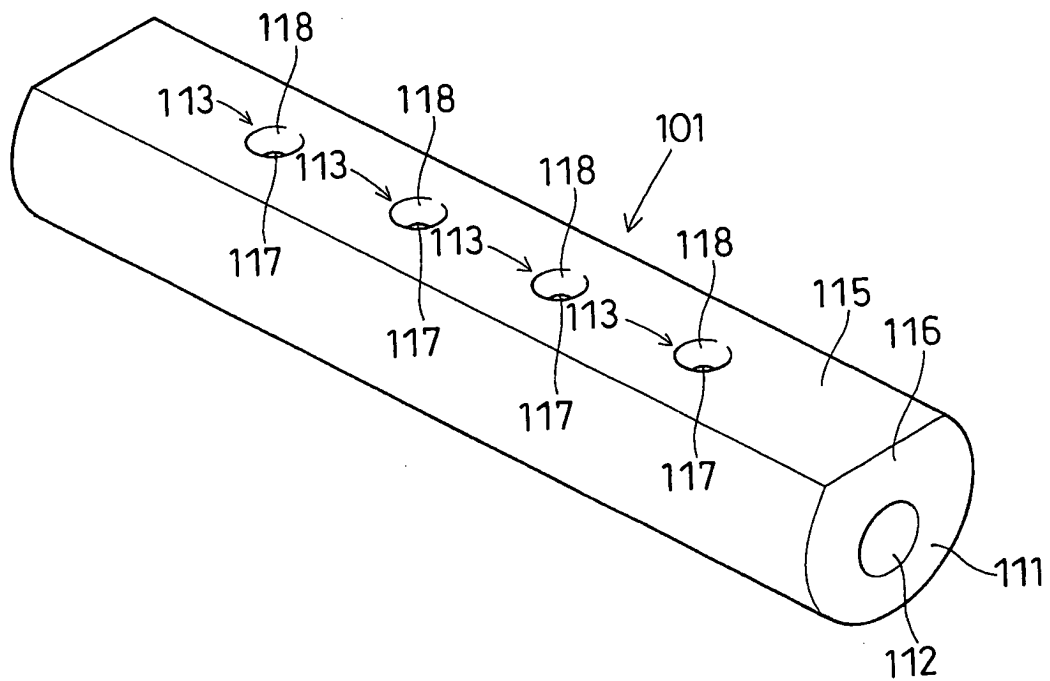

FIG. 9B

A cross-sectional view of a multi-layered structure. A central vertical rod (102) passes through a series of layers. The bottom layer (101) is a thick base. Above it is a layer (106) containing two vertical pins. The next layer (104) has two angled, wedge-like features. Above that is a layer (105) with two horizontal blocks. The top layer is a thin film (102) with a central vertical feature.
